zk013506@gmail.com

788 R1, Johar Town Lahore

As a graduate in Bachelor's in Computer Science, I have embarked on my career journey with a focus on MERN Stack development, I bring a strong foundation in modern web technologies and a passion for creating interactive, user-friendly applications. With a commitment to writing clean, efficient code and a willingness to adapt to new challenges, I'm eager to contribute my skills to innovative projects. My academic background have equipped me with a solid understanding of full-stack development, making me a valuable addition to any dynamic development team Looking for a suitable MERN Stack developer position or relevant position within an ambitious & exciting organization.

PROJECTS

1- Final Year Project (Drive Deals)

A web-based Application where we connect unemployed drivers with auto-owners who need drivers for there vehicles. Drive deals includes shift and experience based jobs for the drivers, where drivers submit applications for the jobs posted by auto-owners. And drivers creates their gigs as well, where auto-owners send hiring requests. Drivers can switch their profiles to Hired/Available as well.

Major Technologies used in Drive Deals development

MERN stack, React JS, Node JS, Express JS, MongoDB, Javascripts, JQuery, Node Package Manager, Creating APIs End-points, APIs Integration, Bootstrap, HTML5, CSS3, Cloudinary (for storing images), MongoDB Atlas , Postman.

2- 3D-Content-Studio-2022

A web-based application for efficient user management of 3D model creation and updates. Enabled users to seamlessly submit and track requests for 3D model object creation and modifications.

3- Trade Mission

Designed a cryptocurrency trading website facilitating the buying and selling of digital coins. Implemented real-time market data tracking for users to monitor daily coin exchange rates and trends.
